

**Supplementary Table 1.** Comparison of adherence by manager and device

	Very good adherence group (n = 38)	Poor adherence group (n = 65)	p-value ( $\chi^2$ )
Manager*			0.196 (1.670)
Manager A	15 (40.5) <sup>†</sup>	35 (53.8)	
Manager B	22 (59.5) <sup>†</sup>	30 (46.2)	
Device			0.306 (2.370)
Device A	9 (23.7)	25 (38.5)	
Device B	19 (50.0)	26 (40.0)	
Device C	10 (26.3)	14 (21.5)	

Values are presented as n (%).

\*In the manager data, one patient from the very good adherence group belonging to manager C is excluded; <sup>†</sup>1 out of 38 patients in the very good adherence group was excluded from the manager analysis due to a lack of manager information.
